Fishing trip log

Record the whole session, including outings with no catches.

TRIP ID / DATE

TIME ZONE / GENERAL WATER NAME

Session and effort

START / FINISH (LOCAL TIME)

MINUTES ACTUALLY FISHED

METHOD / NUMBER OF ANGLERS / RODS

TOTAL CATCHES (WRITE 0 FOR A BLANK TRIP)

Conditions and evidence

AIR TEMPERATURE: C / F | SOURCE

WATER TEMPERATURE: C / F | SOURCE

OBSERVED WEATHER, CLARITY OR TIDE CONTEXT / REPORTED DATA SOURCE

What did you try?

Area, lure or bait, presentation, and time spent on each approach:

What will you test next time?

Keep exact locations private in copies you share. Mark estimates and unknowns clearly.

Complete detailed notes after appropriate fish care. A log does not replace local rules.

Free for personal and club use. No account or email signup required.

Catch record sheet

Use the same trip ID on both sheets. Add a new row for each catch.

TRIP ID / DATE / GENERAL WATER NAME

ID / time	Species / confidence	Lure or bait / presentation	Length cm / in	Weight kg / lb	Outcome

Keep measured values separate from photo estimates.

Use the unit you measured; leave the other unit blank unless you convert it.

Species confidence: confirmed, tentative or unknown. Outcome: released or retained.

If nothing was caught, keep the trip sheet and leave the catch table empty.

For spreadsheets: record effort once per trip, not once per catch.

The downloadable trip and catch CSVs link records through trip_id.
